**Genetic testing Leonberger Polyneuropathy LPN1**

You have contributed samples to our research project . We applied a recently developed DNA test that allows the unequivocal diagnosis of LPN1 carriers. Further details are given on the information sheet at our web site

[http://www.genetics.unibe.ch/content/service/dog/index\\_eng.html](http://www.genetics.unibe.ch/content/service/dog/index_eng.html)

Lab ID	Dog	Kennel	Breeding ID	Sex	DOB	LPN1 genotype
LB1246	Je t'aime	Lions from d'es en Demande		f	23.10.2010	<b>N/N (free)</b>
LB1247	J'adoré	du Plateau Bavrois		f	05.06.2010	<b>N/N (free)</b>
LB1248	June	Lions from d'es en Demande		f	23.10.2010	<b>N/N (free)</b>
X LB1249	Amore Cordi	Golden Honey		f	16.05.2009	<b>N/N (free)</b>

The diagnostic test was carefully conducted using state-of-the-art methodology. Nevertheless, errors cannot be excluded with 100% probability, as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty on the accuracy of the results. Any liability for subsequent damages in the course of an incorrect test result is excluded.

Kind regards

Prof. Dr. Cord Drögemüller
